

Prime Minister Narendra Modi's recent speeches emphasize India's future ambitions and developmental strategies. For instance, during the 78th Independence Day address, Modi focused on India becoming a global leader in several sectors, including renewable energy and high-tech manufacturing. He highlighted projects like the "Green Hydrogen Mission," which aims to make India a powerhouse in green energy, and "Design in India, Design for the World," encouraging domestic innovations with international impact. Additionally, his speech included goals to strengthen India's position in semiconductor production, enhance skill training, and make significant advances in public health through initiatives like the Swasth Bharat Mission
